EDUCATION

Mohammed VI Polytechnic University, Morocco

Oct 2023 – Sept 2025

MSc. in Collective Intelligence | Grade: **16.01/20**

Master's thesis: "LLM-Assisted Deliberation: Using Large Language Models as Structural Argument Advisor in Online Deliberation"

Ekiti State University, Ado Ekiti, Nigeria

Sept 2015 – Jan 2022

B.ENG. Electrical and Electronic Engineering | CGPA: **4.64/5.00**

Class Rank: (3/86)

Undergraduate thesis: "Feasibility study and comparative analysis of a PV-DG hybrid power system"

WORK EXPERIENCE

Graduate Trainee, Dangote Industries Limited, Lagos

Jul 2025 – Pres

Shadow and support senior engineers in plant operations to gain hands-on experience with industrial processes and equipment.

Observe plant workflows to identify inefficiencies and potential issues, providing data-driven recommendations for improvement.

Collaborate with cross-functional teams to understand production challenges and contribute to solutions.

Ensure compliance with plant safety protocols and operational standards during daily activities.

AI Engineering Intern, Deliberatorium

Feb 2025 - Aug 2025

Built a GPT-4o pipeline to decompose arguments into atomic units, identify weaknesses, and generate improved versions, significantly increasing clarity, structure, and relevance.

Cleaned and preprocessed large discussion datasets to enable reliable model evaluation.

Designed multi-step prompt strategies to guide LLM behavior across classification, critique, and rewriting tasks.

Developed quantitative metrics to assess argument quality and performed statistical validation.

Demonstrated that LLM-generated improvements maintained low emotional bias and promoted more logical, evidence-based discourse.

Software Automation Engineer, Huawei Technologies Co., Ltd, Victoria Island, Lagos

Mar 2023-Oct 2023

Managed telecommunication network automation projects

Developed requirement functions as described by Telecommunication companies.

Built and optimized several Business Processes.

Optimized Dashboards using Top Query Language (TQL).

Built web applications on Huawei operation web service

Optimized existing software functions and manually tested all system software; during and after development.

Documented software solutions and performed quality testing.

Junior Developer (NYSC-Intern), Huawei Technologies Co., Ltd

Apr 2022-Mar 2023

Performed UAT testing on system software Optimized business processes.

Built web applications on Huawei operation web service

Documented software solutions.

Student Industrial Work Experience Scheme (SIWES)

May 2019 – Jan 2020

Intern at the TCN, Ikeja West Sub Region 330/132kV Transmission Station.

Ensured the use of PPE at the switchyard.

Recorded daily readings of the company's 110 V battery bank.

Utilized temporary ground to discharge de-energized transmission lines. Reading and interpreting electrical circuit diagrams.

Recorded hourly readings of electrical parameters such as active power, apparent power and voltage of different transmission lines on the BCU (Bay Control Unit).

Accompanied the lines team to change the Glass disc insulator on several 330kV transmission lines to Silicone Rubber Composite Insulators.

TECHNICAL SKILLS

Programming & Tools: Python (pandas, numpy, scikit-learn, tensorflow, matplotlib, plotly), R, SQL, JavaScript.
Software & Platforms: Google Colab, Kaggle Notebooks, Visual Studio, MS Excel, MS PowerPoint, MS Word, Canva

Techniques: Data Cleaning, Data Wrangling, Machine Learning, Dashboard Optimization, Anomaly Detection, Sentiment Analysis, Topic Modeling,

Soft Skills: Project Leadership, Technical Documentation, Effective Presentation, Team Collaboration

PROJECTS

Generative AI Projects:

Agentic Retrieval-Augmented Generation (RAG) for Intelligent Query Response

Personal Project | 2025

Developed an intelligent agent using the smolagents framework that integrates web search (via DuckDuckGo) with LLMs to retrieve and synthesize real-time information.

Implemented a custom Tool class to search a vector-based knowledge base for domain-specific results, improving contextual awareness.

Applied semantic search techniques for event planning use-case (luxury superhero-themed party), showcasing application of AI in niche domains.

Demonstrated end-to-end automation of RAG pipelines: from query parsing and retrieval to synthesis and caching for future use.

Classical Machine Learning Project:

Anomaly Detection in Irradiation and Weather Data Using Supervised and Unsupervised Learning *Research Project | 2024*

Supervised By: Dr. Ikram Chari and Dr. Robert BASMADJIAN, Mohammed VI Polytechnic University.

Duties: Performed data cleaning and imputation of missing values to ensure dataset quality.

Conducted an extensive literature review to inform algorithm selection and methodology.

Applied LOF and XGBoost algorithms across datasets for 12 German cities, assessing their anomaly detection capabilities.

Authored a detailed report and delivered an oral presentation of the project's findings and implications. **Natural**

Language Processing Project:

Sentiment Analysis of Online Discussion on Climate Change

Research Project | 2025

Supervised By: Dr. Manal EL AKROUCHI, Mohammed VI Polytechnic University.

Duties: Performed data cleaning, including typo correction, punctuation handling, and tokenization, to prepare data for analysis.

Applied models (VADER, TextBlob, ClimateBERT, BERT) and evaluated their performance using metrics like accuracy, precision, recall, and F1-score.

Implemented Topic BERT for topic modeling to identify key themes in climate change discussions.

Analyzed sentiment evolution over time to understand public perception shifts in response to major climate events and policies.

Authored a detailed report and presented findings, contributing to the broader understanding of public sentiment and its implications for climate change discourse.

Other Machine Learning (ML) Projects:

Image Classification with Neural Networks

PROFESSIONAL DEVELOPMENT/CERTIFICATES

Introduction to deep learning, Kaggle. Certificate	Apr 2025
Intermediate Machine Learning, Kaggle. Certificate	Apr 2025
Introduction to Machine Learning, Kaggle. Certificate	Apr 2025
Pandas, Udemy. Certificate	Mar 2025
SQL Programming Essentials, Udemy. Certificate	Mar 2025
Applied Data Science Lab, Worldquant University. Certificate	Dec 2024
Data Analysis with R Programming, Google, Coursera. Certificate	Dec 2023
R programming Complete Diploma, Udemy. Certificate	Dec 2023
Digital Power, Huawei Talent Online Certificate	Sep, 2023
Programming With Javascript, Meta, Coursera. Certificate	Jun 2023
Graduate Member, The Nigerian Society of Engineers, GMNSE. Certificate	May 2023
Effective Problem Solving and Decision Making, University of California, Coursera. Certificate	Nov 2022

LEADERSHIP EXPERIENCE

Mentor, Tools Automation team, Huawei Technologies Co., Ltd.	Mar 2023-Sep 2023
Supervised the progress of 4 interns, providing guidance and support in their automation projects.	
Facilitated knowledge transfer and skill development among interns to enhance their understanding and execution of tasks.	
Ensured the successful completion of automation projects by maintaining high standards of quality and efficiency.	
Group lead, final year undergraduate project,	Jan 2021- Aug 2021
Coordinated a team of 3 persons in research and report writing	

ACHIEVEMENTS/AWARDS

Winner, Green Hydrogen Hackathon – #gh2camp Morocco	Oct 2024
Awarded as a member of the winning team at the first Green Hydrogen Hackathon, with a fully-funded study trip to Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany. Sponsored by the MED•GEM Network and funded by the European Union, in recognition of contributions to green ammonia and renewable hydrogen.	
Ibn Rochd Foundation for Sciences and Innovation Scholarship	Sep 2023
Full funding for a 2-year master's program in collective intelligence at the Mohammed VI Polytechnic University campus in Rabat.	
First Class Award	Jan 2022
In recognition of academic excellence and commendable behavior
